## SUMMARY

Junior Data Analytics Engineer passionate about leveraging data to drive insights and support decision-making. With expertise in data management, ETL processes and database systems. I am a dedicated team player and quick learner and I am eager to grow in a dynamic environment and collaborate with cross-functional teams.

## EXPERIENCE

### QA Engineer

#### IE, BALMYCOFFEE project

📅 09/2022 - 05/2023 📍 Turkey, Remote

- Reviewed product specifications and requirements
- Developed a comprehensive test plan and created test cases
- Conducted run-time testing to ensure that software products met the desired requirements and specifications
- Used Confluence and Excel for documentation and MySQL workbench for work with databases
- Analyzed test results and identified areas of improvement, including defects and performance issues
- Achievement: The testing process has been improved by 30% by developing a test strategy that focuses on high-risk areas of the software

### Data Engineer Intern

#### EPAM Systems (Data Laboratory)

📅 07/2023 - 10/2023 📍 Georgia, Remote

- Implemented a comprehensive Data Warehouse, employing both 3NF and Star/Snowflake models, to efficiently store data from diverse sources for reporting purposes.
- Executed data cleansing and normalization procedures using Pandas and NumPy, ensuring data integrity.
- Designed and implemented an ETL process, leveraging PL/SQL procedures.
- Conducted SQL queries to extract valuable insights and support data-driven decision-making.
- Identified and resolved data quality issues, contributing to an overall improvement in data accuracy.
- Developed visually compelling dashboards using Power BI.
- Enhanced testing procedures by writing automated test scripts in Python and Selenium.
- Participated in discussions of business requirements and proposals for their improvement.
- Experienced working in the AWS cloud computing environment.

## EDUCATION

### Data Engineering Training

#### EPAM Systems

📅 03/2023 - 06/2023

### Dentistry

#### Pavlov First Saint-Petersburg State Medical University

📅 09/2015 - 06/2020

## SKILLS

SQL Data Warehousing ETL

Data Modeling Database Design

Data Pipeline Development Cloud

AWS GCP Python DBT

BigQuery Database Systems

DWH MySQL PostgreSql

Power BI GitHub

Data Quality Assurance and Testing

## LANGUAGES

## STRENGTHS

### Result-Oriented and Attentive to details

I am driven by a results-driven mindset that ensures the delivery of high-quality outcomes.

### Strong Desire to Learn

Committed to continuous self-improvement, I eagerly embrace new challenges and am dedicated to expanding my knowledge to stay updated with the latest industry trends.

### Flexibility and Adaptability

Quick to adapt to changing environments and requirements, I thrive in dynamic settings. My ability to pivot, adjust, and take on diverse tasks contributes to effective problem-solving and efficient project execution.
